

Titanium Ligating Clips

Welfare Ligating Clips are Sterile, single-patient-use clips manufactured from high quality titanium.

The V-shaped clip designed for ligation of tubular structures.

Supplied sterile and are used for ligation of organs and vessels in laparoscopic as well as open surgery.

Appliers are available in a wide variety of jaw types and Applier lengths.

Pure Titanium providing maximum vessel occlusion and zero memory preventing tip opening after application. Biologically inert radiolucent and non-magnetic for use with MRI scanning equipment.

Open Appliers colour coded for ease of identification
